

# SUMMER

## English

Our English this term will be centred on the story of the RMS Titanic. We will write a balanced argument, newspaper reports and dialogues. In **SPaG** lessons we will consolidate our learning and focus on applying more of what we know in our independent writing. We will continue with **spelling** lessons, recapping on patterns and rules for prefixes and suffixes. Reading **comprehension** lessons will be centred on sharing a book and will practice techniques to aid our understanding and appreciation of the texts that we read. The children will end each day by having a story read to them. They will also have regular slots in which to read their own books from home, independently. Please help your child to choose an appropriate text.

## Maths

In Maths we will look at telling the time, reading timetables and measurement. We will recap and secure our core skills and arithmetic methods. We will practice **mental maths** strategies through repetition and games. We will try to solve complex problems using bar modelling. We will also be recapping on all Y6 objectives using short flashback sessions and online learning games, quizzes and activities.

## Music

We will start with the topic 'Growth', focusing on street dance, before working on songs for our Year Six production performance.

## French

Our topics are:  
days of week + aller  
accommodation  
transport  
going on holiday

## Our values this year:

**Hope** – to have faith, confidence and high aspirations for the future.

**Joy** – an expression of inner joy and happiness, encouraging others so they can be a source of joy to others.

**Community** – being interdependent, working together where everyone is feels included, needed, valued and important.

## Geography

Our topic this term is Extreme Earth. We will find out about volcanoes, earthquakes, floods, tsunamis. We will look at why and where they appear and the impact that all of these can cause, both the environmental and human.

## Science

As scientists we will be learning about electrical circuits. After half term we will look at the circulatory system and the heart. We will look at the impact that smoking can have on us and at nutrients and food groups and what they do for us. We will design investigations and record our results.

## Computing

During computer sessions we will be looking at Excel spreadsheets. We will also be combining our Art and Computing to do some 3D modelling on the computers.

## R.E

In RE we will try to answer the question 'For Christians, what type of King is Jesus'.

## D&T

This term we will research, design, make and evaluate our own mobile phone cases using felt. We will use two different types of stitching and add our own embellishments.

## PE

Games will take place on Thursdays and be led by Atlas Sports. After half term, we will be doing cricket in our PE lessons.

## Art

In art this term we will also be designing, making and painting props and scenery for our Year Six Production.

## PSHE

This term we will focus on transitions, changes and moving on as we move on to Year 7. We will have some help with dealing with any anxiety we may feel. We will also look at puberty.
